First Aid Checklist

- 3% Hydrogen Peroxide**
Never administer to induce vomiting before consulting a veterinarian or a poison control center. Do not treat wounds with hydrogen peroxide.
- Adhesive Medical Tape**
Secure gauze or bandages. Do not apply adhesive materials to fur.
- Clean Towels**
Restrain, muzzle, or transport injured animals. Clean, protect, or pad wounds & injuries.
- Digital Thermometer** Normal temperature for dogs and cats is 100-102.5° F.
- Emergency Contact Information**
Be prepared with info for your vet, nearest emergency clinic, Poison Control, & local police/fire departments and Animal Control.
- Exam Gloves**
Prevent cross-contamination between you and your pet while administering first aid.
- Eye Dropper or Oral Syringe (without a needle)**
Use to flush wounds or administer fluid medications.
- Gauze Rolls and Gauze Pads**
Use rolled gauze to wrap wounds or muzzle an injured animal.
- Hand Sanitizer Gel or Wipes**
Clean hands before and after treating a wound—do not use on your pet.
- Instant Cold Pack**
Reduce swelling and inflammation after a bee or wasp sting, sprain/strain, or bruising. Do not apply directly to skin. Do not use cold packs to cool an over-heated pet.
- K-Y Jelly or Surgilube** in single-use packets
Use water-based lubricant to protect wounds or eyes or to lubricate a thermometer.
- Milk of Magnesia or Activated Charcoal**
Never administer to absorb poison unless instructed by a vet or a poison control center. Never administer to a pet who is vomiting, having seizures, or unconscious.
- Muzzle** Never use a muzzle on an animal who is vomiting.
- Non-adhesive Bandages**
Control bleeding and protect wounds. Use to muzzle an injured animal.
- Pet's Medical Record** Especially vaccine history, current meds, age, & weight.
- Saline Solution** Use to rinse wounds or eyes.
- Scissors** Cut bandages and tape. Trim fur surrounding wounds, if necessary.
- Sealed Bottled Water**
Cleanse wounds, rinse burns, cool overheated pets by wrapping in wet towels, rehydrate.
- Self-adhering Medical Wrap (Vet Wrap)** Secure gauze or bandages.
- Spare Leash & Collar and/or Location of Pet Carrier**
- Styptic Powder** Quickly slows bleeding from minor cuts.
- Supply of Pet's Chronic Meds** Check expiration dates before administering.
- Tick Comb or Tick Removal Tool**
- Triple Antibiotic Ointment** in single-use packets
Protect wounds before bandaging.
